Worldwide Online**

DECEMBER 3 *(Virtual)*
DECEMBER 4-6 *(In-Person & Hybrid)*

Pengalaman mengikuti GDHF (Global Digital Health Forum) 2024 di Nairobi

Anis Fuad

Global Digital Health Forum

- an annual event hosted by the **Global Digital Health Network**, primarily focused on bringing together stakeholders in the digital health sector, including government officials, developers, researchers, donors, and implementers, to discuss and collaborate on advancements in global health technology;
- a key networking platform for the field, with recent iterations incorporating both in-person and virtual participation across the globe

For the first time ever, GDHF is being hosted outside the US

8. **Local Solutions**: Driving Ownership & Impact
9. Leaving No One Behind: **Digital Health for All**

Appy hour: market place para innovator dan implementer

A large, busy indoor event space, likely a conference or networking event. The room features a high ceiling with a decorative, illuminated geometric pattern. Numerous people, dressed in business casual attire, are gathered throughout the space. Many are seated at round tables with white tablecloths, while others stand and converse. In the background, several tall, white display boards or banners are visible, some with text and graphics. The overall atmosphere is professional and active, consistent with the caption's description of a market place for innovators and implementers.

Towards standards based interoperable systems: a global perspective to interoperability in health

Dec 6, 2024, 08.30-09.30, Tabora

Progress in Developing Interoperable Data Standards for One Health Antimicrobial Resistance (AMR) Surveillance in Indonesia

Anis Fuad

Forum 2024

Closing lecture oleh Director, Department of Digital Health and Innovation WHO

- For development partners:
 - Align around countries' priorities
 - Find government and architecture to put money
- For implementer
 - Share the world you are doing
 - Us standard to build thing
- For academia
 - Measure better what works what does not work, and the investment have impact
